

Pacific University College of Optometry is seeking applicants who have a passion for optometric education with a commitment to student success, creativity, equity, diversity, inclusion, lifelong learning, and research. Preference may be given to those with enthusiasm towards:

- primary eye care
- contact lenses
- ocular disease and/or systemic disease
- pediatrics, vision rehabilitation, and/or vision therapy
- biostatistics and research design

Classroom, laboratory, and clinical assignments will reflect programmatic needs, as well as the successful candidate's expertise and interests.

As applicable, candidates with an OD degree and eligible for licensure to practice optometry in the state of Oregon are preferred. Priority will be given to applicants who have either residency or fellowship training, an advanced degree (MS/PhD), or advanced professional experience.

Pacific University is a prestigious private institution that brings together the College of Optometry, College of Health Professions, College of Education, College of Business and College of Arts & Sciences. The main campus is located in the Portland area between the Cascade Mountains and Pacific Ocean and in close proximity to numerous extracurricular opportunities. Both Optometry and Vision Science students enjoy a rich educational environment, learning full-scope optometry and graduate studies with state-of-the-art classroom, laboratory, clinical, and research technology.

Candidates should submit electronically a letter of application and a comprehensive curriculum vitae to:
